. . Hover over and click the mouse to customize your desktop with a unique, personal "theme" that you choose. Use the icons on the desktop to easily launch your favorite applications. With your very own personalized desktop wallpaper, CyberBuddy gives you total control over your desktop. Use the built-in calendar to schedule your downloads of movie, music, and software titles. CyberBuddy also allows you to play music, videos, and games from other users' computers. This easy-to-use program is a fun way to get up-to-date news headlines, weather forecasts, stock quotes, sports scores, and more. Features include a hot-keys interface to provide easy access to different categories. The most common categories include sports, weather, news, and stock quotes. CyberBuddy offers a help file with plenty of helpful tips and information. The help file also includes a 'report a bug' link that will send an email to the main developer of the program. You can create a favorite list of news categories and use it to quickly access your favorite news sources. You can save up to five different lists, including favorite sports, favorite tech/gadget, favorite movies, favorite games, and more. You can choose to view news by headline, date, and category. CyberBuddy can access your Outlook Calendar and synchronize it with your CyberBuddy calendar. CyberBuddy also displays your system clock on the desktop, and also lets you access news headlines and stock quotes. CyberBuddy comes with an easy to use, intuitive interface and allows you to customize the news headlines, weather forecasts, and stock quotes. It includes easy access to favorite news sources. Twitter feeds can be downloaded and updated automatically by the program, so you never have to log into Twitter to refresh the data. CyberBuddy can also save your favorite Twitter feeds to a favorites list so you can quickly access them when you login. Additional features include a hot keys interface, a 'Report a bug' link, and a friendly help file. CyberBuddy is a free program for people who want to customize the news and weather that they see on their computer screen. The free CyberBuddy program is designed to help you customize the information you see by categorizing news headlines and weather forecasts. The software can display the time, date, and location. CyberBuddy also offers easy access to news and weather from 82157476af
